The Invisible Glass

«Our challenge was to eliminate reflection from external lighting and assure long lifetime of the museum cases. While we had many options, we chose Artglass™ because it was the best combination of look and function - neutral color, low reflection and scratch resistance.»

- WILMOTTE & ASSOCIÉS SA

## The Rijksmuseum – home to one of the world's greatest art collections

After a 10-year renovation, Rijksmuseum's novel approach shows paintings along with period objects displayed in invisible cases. The brainchild of Jean-Michelle Wilmotte, the 400 invisible displays from Artglass™ by Groglass® add new depth and drama to the paintings of Dutch masters adorning the walls. This new intelligent presentation of collections is likely to serve as an example for other museums around the world.

## Artglass™ is used by the finest museums worldwide:

- The Louvre Museum in Paris, France
- The Summer Palace in Beijing, China
- The Prado Museum in Madrid, Spain
- The Pinacoteca do Estado Museum in Sao Paulo, Brazil
- The Vatican Museums in Vatican City, Vatican
- The Gemeentemuseum Den Haag in the Hague, the Netherlands
- The Imperial War Museum in London, UK
- The State Hermitage Museum in St. Petersburg, Russia
- The King Abdulaziz Museum in Dhahran, Saudi Arabia
