15mm glass, Bullet; BR6, Blast: ERP 1, Fire: 14 mm pyran fusion, 23mm PYRANOVA®  
Glass

**Shakhbout City Rehabilitation Centre**

## PROJECT DETAILS

Sheikh Shakhbout Medical City (SSMC) is one of the largest hospitals in the country, offering world-class complex healthcare. SSMC partnered with Mayo Clinic to deliver care that meets international benchmarks. The city helped establish Abu Dhabi as a destination for world-class healthcare excellence.

Future Glass helped bring the Government's and architect's vision to life. We processed and delivered security glass for the façade and the interiors to ensure the safety of doctors, nurses, administrative staff and patients. We used blast-resistant doors and windows to protect the hospital, staff and patients from explosions, bullets and other projectiles. We fabricated each panel at our state-of-the-art facility.

We tested these panels per international safety standards to ensure compliance with local and international safety regulations.
