# FUTURE

Tomorrow starts today

**Project Name:** Bvlgari Hotel  
**Developer Name:** Meraas  
**Architect:** Antonio Citterio Patricia Viel and Partners  
**Consultant:** Fondue Consultants  
**Main Contractor:** Al Jaber Engineering & Consultants  
**Sub-Contractor:** Al Ghurair Construction Aluminium LLC  
**Processor:** Future Architectural Glass  
**Quantity:** 400 sq. metres  
**Location:** Jumeirah, Dubai  
**Product:** VIVIDVIEW (15mm woven mesh (Mandarin mesh) with extra clear laminate)  
**Processes Involved:** Lamination, Tempering, Heat Treatment

## ABOUT THE PROJECT

Located along the coast of Dubai's seahorse-shaped Jumeirah Bay Island, the BvlgariHotel brings fine Italian architecture to the heart of the Middle East. The entire property emanates a charming Mediterranean vibe, and draws everybody's eyes to its stunning coral-inspired exterior.

## THE CHALLENGE

Creating such a large luxury space came with a host of challenges. While working on the project, our topmost priority was to use glass that provided residents with complete privacy. Ensuring guest safety and sourcing materials that met the design's uncompromising quality standards posed its own questions. However, the most interesting aspect of this project was meeting the customer's durability and acoustic requirements.

## OUR INNOVATIVE SOLUTION

In order to meet the architect's unique vision we used VIVIDVIEW glass panels. With the help of the panel's mesh lamination, we were able to achieve not just the unique coral colour, but also its texture. The mesh within the panels is just 1.3 mm thick, making the panels quite light and easy to install. The VIVIDVIEW panels are available in a wide range of large sizes, which made it the perfect fit for this project. We used 15 mm laminated panels to reduce ambient noise and meet the customer's privacy and safety requirements. We processed every single panel in our state-of-the-art facility and tested them before delivery to significantly reduce the chance of on-site rejections.

## THE OUTCOME

The SPECTROVIEW panels we used have provided the area with a dynamic effect that enhances the overall elegance of the building's interiors. The panels used are highly durable, ensuring that the glass structure always looks its best. The partitions delivered offer a vibrant mix of colours, which allowed us to bring the architect's vision to life without compromising on structural integrity.
