

DECOVIEW

Enjoy unmatched aesthetics with decorative interlayers.

DECOVIEW panels have a decorative interlayer fused between two glass panes. We use heat, pressure, and adhesive materials to create these bespoke laminated panels. You can choose between fabric, PET, wood, and other interlayers to meet your design needs. As an end-to-end solutions provider, we understand that laminated glass, like DECOVIEW, requires extreme care while handling. Our experienced team of installers will ensure the product gets glazed seamlessly into the structure, maintaining the highest quality standards, and protecting the overall aesthetics of the space.

Key Features

Luxury Appeal

Glamorous and bespoke designs can be created to elevate the luxury appeal of the interiors.

Durable and Versatile

DECOVIEW panels come with durable and versatile glazing systems for enhanced safety and protection.

Privacy

You can achieve multiple designs, patterns and colours for pleasing aesthetics that offer partial or complete privacy.

Robust Processing System

We use state-of-the-art European technology to process and test each panel and ensure the perfect quality every time.

Full traceability

Each pane is bar-code labelled and scanned, which helps in determining process parameters for backward traceability, ensuring complete quality assurance.

End-to-End Service

Our team provides turnkey solutions in developing the concept design collaboratively, detailing the engineering, and facilitating installation. Given our years of experience and expertise, you can rely on efficient design assistance and a high-quality installation.

Technical Specifications

Feature	Description
Glass Types	Clear, low iron
Colours	Tinted (bronze-warm tone, grey-cool tone)
Designs	Customisable artistic designs and printed concepts
Views	Clear, opaque, and partial openings
Forms	Flat, annealed, laminated, heat-treated
