

## CHROMVIEW

### Reflective and durable panels for enhanced aesthetics

Our CHROMVIEW panels combine the durability, safety and corrosion resistance of glass with the reflective properties of mirrors. We apply a sturdy but thin metallic finish on one side of the glass to achieve the reflective properties of a mirror. Depending on your needs, we can control light transmission between the range of 3% to 65% and can create flat, curved, annealed, laminated or heat-treated panels depending on the design requirements.

#### Key Features

##### *Robust*

CHROMVIEW achieves a mirror-effect without compromising glass functionality and safety.

##### *Unique*

Bespoke patterns can be created to meet the design intent.

##### *Metallic-effect*

Provides stainless steel effect on glass avoiding the need to install a second metal panel skin for achieving the same.

##### *Privacy*

Facilitates privacy without compromising the aesthetic appeal.

#### Technical Specifications

Feature	Description
Glass Types	Clear, low iron
Colours	Shades of silver
Designs	Dots, lines, custom patterns, smooth gradient effect
Views	Light transmission can be controlled in the range of 3% to 65%
Forms	Flat, curved, annealed, laminated, heat-treated
Fabrication	Can make holes, cutouts, and simple shapes

Applications: Show as illustrative icons

Partitions, doors, furniture, shower cubicles, wall cladding, shop fronts, railings, decorative elements, one-way mirrors, wall décor, salon or shop interiors
