CLAROVIEW

CLAROVIEW

Anti-reflective glazing solution for unobstructed views

CLAROVIEW is a specialised glass product that reduces the surface reflection. The panels maximise visibility while minimising reflection. CLAROVIEW is eight times clearer than clear glass and is ideal for display units and showrooms. CLAROVIEW solution incorporates a sophisticated anti-reflective glass that cuts residual reflection to less than 0.5%.

Key Features

Unparalleled Clarity

CLAROVIEW panels have a reflection rate of less than 0.5% per surface, eight times lower than clear glass. They also boast neutral and uniform reflection colours, assuring you of minimal reflection and unobstructed views.

Highly Durable

The durability performance of these panels meets ISO standards.

End-to-End Service

Our in-house engineers will provide a consultation to understand your safety requirements and suggest the glass and glazing required to meet them. Once we process the glass and glazing system, we will install it on-site to ensure it meets the required safety standard.

Luxury-feel

Creates an aesthetically unique and stunning statement.

Technical Specifications

Feature	Description
Glass Types	Clear, low iron
Colours	Neutral
Designs	Not applicable
Views	Up to 98% light transmission
Forms	Flat, curved, annealed, laminated, heat-treated
Fabrication	Can make holes, cut-outs, and simple and complex shapes

Dimensions

Maximum Size: 2.5 x 5 m

Applications: Show as illustrative icons

Shop fronts, museums, partitions, picture frames, control towers, zoos and aquariums, observation rooms, display windows, restaurant shop fronts, car showrooms, jewellery shops
