ONYXVIEW

ONYXVIEW

Stone laminated panels for a truly unique look

An innovative composite glass, ONYXVIEW contains a thin layer of natural stone between two or more glass panes. The glass provides support and protection, enabling you to create bespoke designs. The lightweight panels are easy to maintain, and the stone layer is so thin it allows light to pass through, creating a unique ambience. Depending on the stone selected, these panels achieve high levels of translucency whilst providing privacy.

Key Features

Low Maintenance Cost

Since the stone layer gets laminated between glass, these panels become easy to maintain and clean, lowering the overall maintenance cost.

Robust Processing System

We use state-of-the-art technology to process and test each panel and ensure the perfect quality every time.

Luxury Appeal

Glamorous and bespoke stones can be selected to elevate the luxury appeal of the architecture.

Durable and Versatile

ONYXVIEW panels come with durable and versatile glazing systems for enhanced safety and protection.

Privacy

You can achieve multiple designs, patterns and colours for pleasing aesthetics that offer partial or complete privacy.

Full Traceability

Each pane is bar-code labelled and scanned, which helps in determining process parameters for backward traceability, ensuring complete quality assurance.

End-to-End Service

Our team provides turnkey solutions in selecting the stone, detailing the engineering, and facilitating installation. Given our years of experience and expertise, you can rely on efficient design assistance and a high-quality installation.

Technical Specifications

Feature	Description
Glass Types	Clear, low iron
materials	Onyx, alabaster, quartz, marble, granite

Designs	Natural stone designs
Views	Depends on the stone selection
Forms	Heat-treated, laminated
Fabrication	Only rectangular panels
Application	Wall cladding, back-lit panels, desktops, lobby partitions

Dimensions

Maximum Size: 1.8 x 4m

Applications: Show as illustrative icons

Wall cladding, back-lit panels, desktops, lobby partitions

SYSTEM Offerings to be included (same as decoview)
